

AllThings.Bio

PRO

Data Value Labs
27-29.04.2022

Organised & moderated by
[Prospex Institute](#)

This project has received funding from the Bio Based Industries Joint Undertaking under the European Union's Horizon 2020 research and innovation programme under grant agreement No 887070.

Concept

- Allthings.bioPRO is developing a **serious game and a mobile app** to enable citizens to learn and to express their interests and preferences about bio-based products. Ultimately, these tools will **generate data and insights** for stakeholders to boost the bioeconomy.
- Our Data Value Labs offer an opportunity for you to engage in an interactive and **in-depth multistakeholder discussion** on how these outputs could be of value for your work as **policymaker, researcher, industry actor or CSO** in the bioeconomy field.
- Each data lab focusses on one of the Allthings.bioPRO **mission themes**: 1) Kids & schools, 2) Food packaging, 3) Fashion & textiles, and 4) Jobs & careers.
- **REGISTER** here: www.allthings.bio/events/data-value-labs/
